

Shadow Enyugma

This challenge contains **two levels**.

In **Level 1**, you are given files.

Inside these files, a **string** is hidden in plain sight.

Your task is to **analyze the files and crack the password**.

The password you obtain from **Level 1** is required to unlock **Level 2**.

Level 2 is locked.

Only the correct password from Level 1 will allow you to proceed.

Once inside Level 2, observe carefully.

Not everything is what it seems.

Some answers are hidden where people usually don't look.

Your final goal is to **find the flag**.

Flag format:

CTF{*****}
